

Dear Distributor,

In order to make service and repair of pumps easier, double shielded pre-greased ball bearings according to following list will be introduced during the spring 2003. The bearings are metal shielded and filled with special grease suited for electrical submersible motors.

Part Number	Old Type No.	New Type No.	Pump model and position	Estimated date of introduction
130666	6003-2RS1/C3	6003-2Z/C3HT22	Minex upper	In production
130667	3205 ATN9/C3	3205A-2ZTN9/C3HT22	Minex lower	In production
130949	6305-RS1/C3	6305-2ZC3HT22	Matador, Senator upper	In production
130951	3310 A/C3	3310 A-2Z/C3HT22	Matador, Senator lower	In ten weeks
132358	6308-RS1	6308-2Z/C3HT	Maxi, Magnum upper	In production
132888	3309 A/C3	3309 A-2Z/C3HT22	Midi, Semi lower	In ten weeks
140059	3305 ATN9/C3	3305 A-2ZTN9/C3HT22	Minor, Major Master, Senior, Sandy, Super lower	In production
140337	6204-RS1/C3	6204-2Z/C3HT22	Minor, Major, Master, Midi, Senior, Sandy, Super, Semi upper	In production
140362	6203-RS1/C3	6203-2Z/C3HT22	Minette, Salvador upper	In production
140363	6305/C3	6305-2ZC3HT22	Minette, Salvador lower	In production

Note!

Ball bearing part No. 130949 will be deleted when stock is finished and replaced by part No. 140363. The spare parts lists will be adjusted accordingly. Lower ball bearing part No. 132406 type 7311BECBP for Maxi pump (2 nos. used) and Lower ball bearing part No. 50 391 00 type 3316 A/C3 for Magnum pump are unchanged and still being used.

Interchangeability:

The dimensions of ball bearings are unchanged and same part numbers are therefore being used. When new bearings are fitted in the "Old Line" or New Line pump models, the original covers and spacers must be re-used.

Yours faithfully

Sören Eriksson
