Subject:  
New updated pump curves Bravo 400,500 and 600

## Dear Distributor,

The impellers for Bravo 400,500 and 600 have been redesigned. The efficiency is higher and the QH curves are better. The power consumption is more or less the same as before. The data sheets on Extranet and Internet have been updated. Brochures will be updated shortly.

## Pumps concerned

Bravo 400.020/190 50&60 Hz, Bravo 500.020/190 50&60 Hz, Bravo 600 020/190 60 Hz

## Time for change

The change took place during the first half of 2015.

Yours sincerely,  
*Tore Hovland*  
Product Manager
